

## Assignment 3.3 – Conditionals

Create an R Markdown document that outputs either an HTML or DOC file.

- a. Write a function that returns the correct sound that a user-specified animal makes. Include at least four animals. Do not use `switch()` for this question.
- b. Write a function that acts like a Magic 8 Ball. It should take a question as an argument and return an answer (randomly) as output. (Hint: Consider using `switch()` in this function!) Include a sample question that calls the function to demonstrate.
